PEDAGOGICAL ASPECTS OF ADAPTATION OF SYNERGETICS STATEMENTS TO THE TRAINING
OF HEALTH CARE PROFESSIONALS 44

Currently the use of information technology is an integral part of any health care professionals activity. The paper considers features of adult learners caused by the life, domestic, social and professional experience, the desire for independence and self-management, high motivation to learn as well as the specification of medical professionals. The author concludes the impossibility of the health professionals training in the area of information technologies on the base of standard techniques focused on higher education and requires implementation of special foundations and technological methods and techniques of training. It is shown that information competence of health professionals is formed not only by receiving information from outside (the teacher), but also through the use of their own opportunities. The paper substantiates practicability of adapting the principles of synergetics into the pedagogical process. The experience of creating pedagogical conditions for managing of courses by using the principles of synergetics is considered. Development of multi-level teaching aids and reference materials and encouraging listeners' communication for sharing experiences, ideas and facts connected with the professional implementation of information technologies are the basis for acquiring new knowledge or practical skills.

Key words: health care professionals, information competence, andragogics, synergetics

HISTORICAL AND PEDAGOGICAL FOUNDATIONS OF THE GENESIS OF STATE HIGHER EDUCATION

IN GREAT BRITAIN 156

The aim of this article is to identify peculiarities and background of the genesis of state higher education in Great Britain. In the late 11th – early 12th centuries big educational centers appeared on the basis of some cathedral and monastery schools to become later the first universities. Oxford and Cambridge founded in Britain in that period remained the only universities for more than 600 years. The historical and pedagogical analysis makes it possible to affirm that Oxbridge laid the basis for higher education in Britain

Key words: higher education, medieval university, college, Oxford, Cambridge
